PERSONAL PROJECTS

Laravel Based Blog Project

I developed a blog script with Laravel. It has SEO optimization, pagespeed optimization, Schema.org optimization etc. Demo: <https://dogukan.dev>

Social Network Project

I developed a social network project for my Database Management class. It's like LinkedIn. Repository: <https://github.com/dogukanoksuz/dbms-project>

Dogukan.dev v2

I developed a web frontend project for my personal blog site. It uses Tailwind and JavaScript ES6 on the hood. dogukanoksuz/dogukandev-v2

Realtime Collaborative Document Editor

I developed a realtime collab document editor for my graduation project. It uses Livewire for realtime and NodeJS Websocket for realtime editing on the hood.
